

Offshore iPhone Mobile Application Development in China

Written by Daisy Wang
Beijing RayooTech Co., Ltd.

Its 'iPhone wave' going around the globe and people are going crazy over Development of iPhone mobile application and its outsourcing business. So what's iPhone!

According to In-Stat report, there are more than 1 million iPhone users in national mobile network in China at the end of 2009, which occupied almost 15% of the global iPhone sales. In-Stat said "we are very surprised that this number is 4 times than we expected before, it is absolutely do not doubt that iPhone will be more successful than iPod development in China".

The report also shows the U.S. mobile phone users and Chinese mobile phone users purchases exists the vast philosophy differences. Most U.S. users use phones as business and office tools, while Chinese users use it for network and entertainment purposes. This preference of Chinese users of Apple iPhone, just consistent with the functional characteristics of iPhone; additional, take the advantage of its user interface in China, iPhone is particularly suitable for the Chinese market.

With the launch of iPhone, custom built applications for them marked a new beginning in the mobile application development industry. The big plus points that iPhone hold is its popularity and density among users, no massive porting hassles, cost effectiveness in comparison to any other platform etc.

iPhone mobile application software development

iPhone OS is the platform used to develop applications for iPhone and iPod touch devices.

All of the tools and technologies required to develop application for iPhone OS are included with the iPhone SDK. The free SDK, one can say "the tool chain, don't need license and not restricted to running only on Apple's operating system .In fact ,a Linux and Windows user can build and install application on their iPhone without ever touching a Mac.

Few technologies bring out everyone's hidden geek, and the iPhone did so instantly upon its release. Offshore mobile application development for iPhone took a new dimension. Beijing RayooTech Company is among the front runner companies to provide custom and web based

applications on the iPhone.
