

Offshore Software Development Outsourcing in China

Written by Jerry Tang
Beijing RayooTech Co., Ltd.

As the world's largest manufacturing country, China has already been familiar with the concept of outsourcing. Until now, it has dominated the global outsourcing manufacturing market for several decades. Since recent years, China has attempted to outsourcing in information technology—an entirely different industry. China attached great importance to its emerging software and service outsourcing industry, especially under the current background of global financial crisis, such a technology-intensive industry has great significance to the current economic growth.

Regard China as the new destination for offshore IT outsourcing, lots of global companies and IT leaders from many countries and various industries have already established their offshore software development outsourcing in China.

There are many factors are contributing to the growing interest to offshore software development outsourcing in China:

1- Low Cost Services

The cost of offshore software development outsourcing in China is presently lower than in India 。 You can save a business anywhere from 30 to 80 percent by hiring an in-house IT staff.

2- China is A Member of WTO

Since 2001,China has been a member of the World Trade Organization with which we can predict that China will become one of the largest world economies within five decades.

3- The Supporting From the Government

Chinese government made plans for all the IT outsourcing industry of our country, including the offshore software development outsourcing. With this, the funding and other supports to IT outsourcing development programs are granted.

4- The Growth of the Professional Team

Every year in China, there are more than 700,000of students with computer engineering degrees and 200,000 IT specialists with 50,000 professionals joining the software outsourcing sector.

All these advantages make the software industry become an important strength to boost the development of electronic information industry, and make it play an active role in promoting the national informationization process.
